SECUREMESH SERIES

High Security Welded Wire Mesh Fence

Securing America & Its Most Critical Assets

End-to-End Perimeter Protection, Global Presence, 25 Years of Experience

At Black Security Products, we design and manufacture best in class security solutions that protect critical assets through innovation and know-how. Proudly Made in America, we combine global expertise with local excellence to set new standards in perimeter security.

For over 25 years, we've led the perimeter security industry, with the most robust materials and combining cutting-edge technology. Innovation drives us—we don't just react to threats; we anticipate them. Our advanced systems are designed to combat evolving security challenges, ensuring unmatched protection.

As a trusted global brand, we deliver tailored solutions for diverse threats, from international borders to critical infrastructure. Our products meet the most rigorous global security standards, reinforcing our commitment to reliability in even the harshest environments.

At Black Security Products, we're not just securing perimeters—**we're shaping the future of security.**

BSP SECUREMESH LEVEL I

BSP SecureMesh Level I is a modular weld-mesh fencing system that is designed to deliver security, without compromising aesthetics and durability. The dense weld mesh fabric makes it virtually impossible for intruders to climb the fence. It also makes it difficult for anyone to use wire-cutting tools to create an opening. The fence simply does not provide sufficient space for operating a cutting tool. BSP SecureMesh Level I comes with a 15-year warranty.

The dense, closely spaced mesh inhibits the use of commonly available cutting tools such as bolt-cutters, making the fence difficult to breach. Additionally, the small apertures in the mesh prevent gripping, effectively thwarting climbing attempts. These anti-climb, anti-cut attributes ensure that your asset remains secure, deterring potential intruders and maintaining the integrity of your perimeter.

BSP SecureMesh Level I is also designed with high visibility in mind, ensuring that security personnel or surveillance cameras have a clear line of sight through the fence without compromising protection. The durable coating on the weld mesh not only provides resistance to corrosion and harsh weather conditions but also ensures a long-lasting, low-maintenance solution. This combination of robust security features and enhanced longevity makes BSP SecureMesh Level I an ideal choice for high-security installations such as critical infrastructure, industrial facilities, and commercial properties.

FEATURES

Available in heights up to 15 feet

ANTI CLIMB & ANTI CUT

The closely spaced dense mesh design inhibits the use of commonly available cutting tools like bolt cutters, making the fence difficult to cut and climb, thus preventing breaching.

GOOD VISIBILITY

Despite the dense mesh design, the fence provides clear visibility so that it is CCTV friendly, exposing potential intruders.

POWDER COATING

Constructed from hot dip galvanized steel and powder-coated, the fence provides superior resistance to corrosion, ensuring a long-lasting and aesthetically pleasing finish.

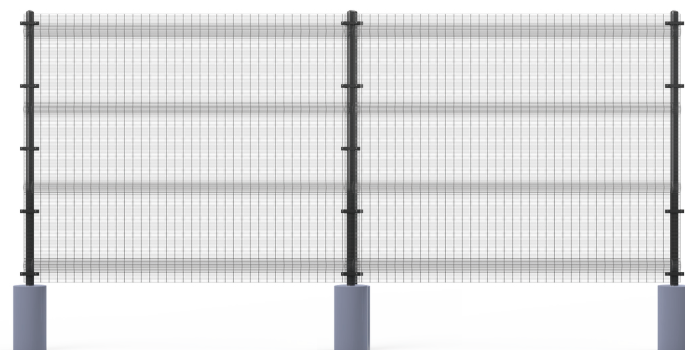

CUSTOMIZED DESIGN

We can design to your site requirements, leading to no need for site modifications or fabrication during installation.

HIGH IMPACT STABILITY

We engineer our systems to withstand local environmental conditions and wind loads.

PANEL

Mesh Size: 3" x 0.5"
Wire : 4 ga / 6ga / 8ga / 10ga / 10½ ga

POST

Type Options: Circular post 2-7/8" / 3"x3" C Channel / Square HSS
Available Heights: Ranging from 4' to 15'

COATING

Finish: Polyester Powder Coated
Coating Thickness: Min. 60 microns (Top Coat)
Coating Standard: BS EN 13438

COLOR OPTIONS

				
Black	Desert Tan	Olive Drab	Bronze	White
RAL 9005	RAL 1001	RAL 6002	RAL 8016	RAL 9010

ASTM A123

Standard Specification for Zinc (Hot-Dip Galvanized) Coatings

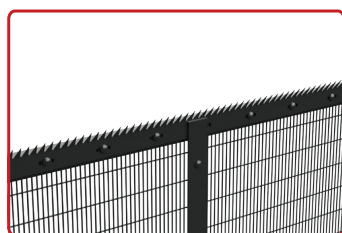

BS EN 13438

Powder Coating Standard
